

**LET'S WORK TOGETHER TO MAKE THE ARTWORLD
A CARBON NEUTRAL INDUSTRY.**

Offsetting the CO2 emissions in your studio is easier than you think!

TO CALCULATE YOUR CO2 USE ONLINE:

As an artist, most of your emissions can be broken down into air and car travel, electricity consumption, heating and materials.

AIR AND CAR TRAVEL: go to the flights and car tabs on [Carbon Footprint Ltd's detailed calculator](#).

(<https://www.carbonfootprint.com/calculator.aspx>)

HEATING (from natural gas, propane or fuel oil): use the [EPA's carbon footprint calculator for your zip code](#).

(<https://www3.epa.gov/carbon-footprint-calculator/>)

ELECTRICITY: look at a recent bill from your electricity provider. It will tell you the total kW hours used in the last year. Then use [Carbon Footprint Ltd to calculate your CO2 consumption based on your provider](#).

(<https://www.carbonfootprint.com/calculator.aspx>)

BASIC MATERIALS (like paper, electronics, and trash): go to [CoolClimate Network's calculator](#).

(<https://coolclimate.berkeley.edu/business-calculator>)

SPECIALTY ITEMS THAT ARTISTS USE (such as paint, metals, or cement or anything else you use): go to [The CO2 List](#).

(<http://www.co2list.org/files/carbon.htm>)

You might worry that you're not accounting for all your emissions. To be safe, Peter Halley Studio added an extra 20% to the total metric tons of CO2 we calculated using these websites.

AFTER YOU CALCULATE YOUR EMISSIONS, CHOOSE AN OFFSET PROJECT THROUGH GOLD STANDARD FOUNDATION:

<https://www.goldstandard.org>

AS SOON AS YOU'VE COMPLETED THE PROCESS AND MADE YOUR STUDIO CARBON NEUTRAL, PLEASE LET US KNOW SO WE CAN ADD YOUR NAME TO THE LIST OF PARTICIPATING ARTISTS!

(<https://www.artworldoffset.com/participants>)

To confirm your participation, or with any questions, please write to us at:
